AKINOLA FAROUQ AKINKUNMI

Full-stack Web Developer

Address Nigeria

CAREER OBJECTIVE

Dedicated Full-stack Developer with excellent hands-on experience in system engineering, project management, and backend development with a proven record of delivering sensible customer-focused business technology solutions. Possess full-stack development experience with other related methods and processes to leverage solutions that impact code implementation and customer experience. Demonstrate ability to analyze, design, develop and integrate web applications focusing on high availability, low latency, and scalability. Excellent at understanding the business needs, project requirements, technical specifications, and the complete software development life cycle, including Quality Assurance and monitoring. Committed to supporting the development and refinement of processes and metrics to drive continuous improvements across functions in a matrix environment.

SKILLS

- Demonstrated ability in designing, developing, and maintaining simple to highly complex web applications.
- Testing and Maintenance
- Database Management
- Project Management
- Strategic Planning
- Client Relationship
- SKILLS HIGHLIGHTS

- Ensures projects are completed on time and within budget and customized software solutions.

- Excellent ability to establish and work to priorities while managing multiple workstreams.

- Within a team environment.

- Proficient in
- Tech Stack: HTML, CSS, JavaScript, jQuery, Bootstrap, React, MySQL, Tailwind CSS, MongoDB, PHP, Laravel Framework, Livewire, Node js, Git version control amongst others.
- Written and Oral Communications

- Web Development

- Code Implementation
- Quality Assurance
- System Engineering & Repair
- Reporting and Documentation
- Network Configuration
- Possesses keen attention to small details and gathers information through careful research and analytical techniques.
- Proven ability to work in cross-functional teams without losing focus on the required balance between task and target.
- Strong ability to multitask, perform with a sense of urgency for rapid issue resolution, and work effectively individually and
- Knowledgeable in testing and debugging, API design, diagnosing, and solving system software and hardware issues.
- Microsoft Office Suite and Photoshop.
- Technical Support

- Code Debugging

EXPERIENCE

FREELANCE FULLSTACK WEB DEVELOPER — Upwork

December 2022 - Present

- Worked on a variety of web development projects for clients worldwide, demonstrating adaptability and remote collaboration skills. Utilized version control software such as Git to manage code changes and collaborate with other developers.

- Developed and maintained a diverse portfolio of web applications, including e-commerce platforms, e-learning systems, financial applications, and medical platforms.

- Managed project timelines and deliverables independently, ensuring client satisfaction and meeting deadlines.

- Developed and maintained web applications using HTML, CSS, JavaScript, PHP, Laravel, React, Livewire.

- Communicated effectively with clients to understand requirements and provide technical solutions.

- Maintained a 100% job completion rate on Upwork, demonstrating consistent reliability and client satisfaction.
- Upwork profile: https://www.upwork.com/freelancers/~01424c506715124141

FULLSTACK WEB DEVELOPER — Fundomni Ltd

Platforms: FindTheLoan.com, CuChat.chat, BizSavvy.me
December 2022 – Present

- Designed and developed multiple production web platforms serving different business use cases, including SME financial tools (BizSavvy.me), a loan marketplace (FindTheLoan.com), and an AI-powered chat platform (CuChat.chat).
- Developed scalable backend systems using Laravel (PHP) and FastAPI (Python), combining clean MVC architecture, reusable service layers, RESTful APIs, Redis-based async processing, and OpenAI-powered AI services within Dockerized environments.
- Engineered and optimized relational databases using SQL, improving page load times by approximately 15%.
- Integrated third-party services and APIs, including payment gateways (Stripe, HitPay, Fazz) and external platforms, to extend application capabilities.
- Implemented secure authentication, authorization, and role-based access control across platforms.
- Diagnosed and resolved critical production issues, reducing application downtime by ~10%.
- Ensured responsive, mobile-first UI implementations across devices and browsers.
- Used Git for version control and collaborative development following structured workflows.
- Managed development tasks and milestones using Trello, ensuring timely delivery of features.
- Provided technical support and troubleshooting via video calls when required.
- Consistently adhered to industry best practices, writing clean, maintainable, and well-documented code.

FULLSTACK WEB DEVELOPER — Kun's Logistics

May 2022 – July 2023

- Deliver appealing and functional web design and code new site initiatives to support the dispatch logistic and freight forwarding operations using HTML, PHP, JavaScript, Git, and other related tools

- Develop databases utilizing PHP and MySQL to streamline freight operations by creating, assigning, and tracking loads, offering innovative solutions, and increasing customer satisfaction

- Edit website through administrative backend and utilizes marketing tools to produce daily newsletters

- Consistently improves coding of CSS and JavaScript to enhance functionality and user experience and develops sites in standards that support multiple web browsing clients

- Guided the technical flow of the project activity from software design method, business requirements, and tools needed to solution development and delivery

- Deploy existing functionalities and integration in dynamic CRM applications with web resources to customize application user interfaces

- Leveraged web technologies in designing and establishing a logistic website to meet customers' prompt delivery, security, and cost expectations.

IT TRAINEE — Globaltechs World Computer Institute
January 2015 - January 2019

- Acquired knowledge in a computer system, such as troubleshooting and recommending appropriate changes to improve systems and network configurations and determining hardware software requirements

- Participated in the planning and implementation of software engineering activities, including necessary tests and UATs on scalability, security, and stability to develop and deliver software products

- Consistently designed, configured, and tested network and operating system software to identify malfunctions in system components and implement required repairs to restore the device's functional working condition

- Worked alongside a team of technical experts on system design and workflow to create quality and scalable solutions

- Managed interaction with users to analyze and resolve system errors, workflow errors, and other related system issues.

EDUCATION

B.SC. IN BIOCHEMISTRY
— University of Ilorin
Kwara, *Jan 2021*

HIGHER DIPLOMA IN SYSTEM ENGINEERING
— Globaltechs World Computer Institute
Jan 2019
